

Is your Network Secure from All Attacks?

If you think you are **ONLY** vulnerable to external threats, think again.

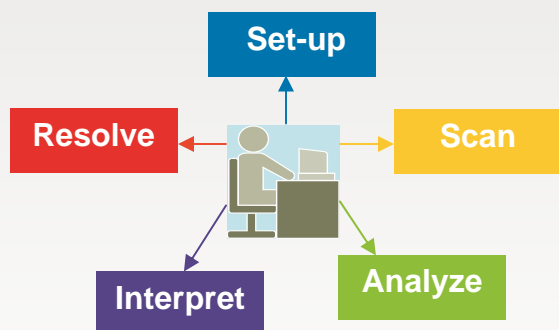

“More than 75 percent of unauthorized access to information systems is committed by employees, as are more than 95 percent of intrusions that result in significant losses” - Gartner

Knowledge is power. Know what threats you are up against. And how you can protect yourself from attacks.

- Lack Security Expertise
- Vulnerable to Security Threats
- Failing or Struggling to Meet Regulatory Compliance

Network Security Vulnerability Audit

P4 can help your business by proactively scanning your IT networks for vulnerabilities you may not even know existed. At the end of this process, our network security specialists will generate a Vulnerability Audit Report, an interpretation of this report and remedies to resolve security risks.

P4's Proactive Security Solution will:

- ◆ Identify and mitigate threats
- ◆ Scan for vulnerabilities such as insecure authentication, lack of encryption, access control and much more

Most importantly when you choose P4's Network Security Vulnerability Audit, you gain:

- ◆ Deep insight into your network and systems
- ◆ Peace of mind
