

Fact Sheet

Corporate Overview

P4 Performance Management, Inc. (“P4”) provides intelligent and innovative Selective IT Outsourcing Solutions to customers who want to ensure high availability of their business applications and communication networks through a combination of hosted/collocation services, remote monitoring & management, security management and professional services.

Customer Challenges

- Ever increasing and unpredictable operational costs
- Lack of control and visibility of mission critical applications and systems
- Developing in-house solutions and maintaining expert resources is time consuming and expensive
- Increasing regulatory requirements

P4 Solutions provide:

- **Budget Predictability and Lower Total Cost of Ownership** – Fixed monthly recurring fee structure with no capital expenditure resulting in potential immediate ROI
- **Control and Visibility** – Complete real-time web-enabled visibility and monitoring from the network layer to the application layer
- **Managed Service** – 7x24 monitoring and management support by dedicated industry experienced professionals
- **Highly Secure & Available** – Reduces security threats and provides higher availability & reliability
- **Regulatory Compliance** – Strategy planning & managed audit expertise

P4 Offerings include:

- **Hosting / Collocation**
 - Hosting Design & Build
 - Open Source SaaS
 - Server & Application Hosting
 - Data Center Consolidation & Relocation

- **Remote Monitoring & Management**
